

JEOL (EUROPE) SAS - organizační složka

World Leader in High Grade Scientific Instruments

seeks, for the territories of Czech Republic and Slovakia

SERVICE ENGINEER

SERVICE ENGINEERS M / F

As part of a high priority project in Central Europe, the applicants will assume, following a two years training period in Czech Republic, Slovakia and in Europe, responsibility of installation, user's training and servicing Electron Optics Equipments in their designated territories.

Preferably VS/VOS educated in electronics or physics field, they have ideally two years experience in similar duties or wishes to integer an European wide Service Department within a multi-technical environment (physics, mechanics, vacuum, computer, chemistry).

The applicants are endowed with a great autonomy (B driving license is needed), within respect of the company's procedures (English read, written and spoken required), thanks to any provided necessary working tools and facilities at their own location.

The excellence of their human relations and their open-mindedness will greatly help to match the Customer Satisfaction.

Involved and keen on technologies, the applicants will be reactive and available.

Thanks to send your applications with your curriculum vitae and one motivation letter to following address:
