

Instructions for processing of thesis assignment in the web KOS system

for: **STUDENT**

Orientation in the document: Follow the captions of the screen previews and look for **red-framed fields**.

You will receive an email from noreply@cvut.cz with the subject "**Invitation to accept assignment**" with the following text:

STEP 0

Dear NAME OF THE STUDENT,

the assignment for your thesis TITLE OF THE THESIS has been approved and signed by the relevant persons.

Now, it is necessary for you to sign the assignment immediately. You sign the assignment by clicking the **"APROOVE ASSIGNMENT"** and then confirming it in the "APROOVE THE ASSIGNMENT" dialog box in the KOS system. The button is located in the "State Exams" menu in the "My Theses" section.

Without the signed assignment and declaration, the thesis may not be accepted for defense! Do not postpone accepting the assignment!

After clicking "ACCEPT ASSIGNMENT", a new window with KOS systém will pop up → log in and in the "**State Exams**" menu, select the item "**My theses**". If the link does not work, go to the KOS web manually.

STATE

Assignment preparation → Approval of assignment → Assigned → Handed → Accepted → All reviews inserted → Defended / Undefended

ASSIGNMENT

Signatures:

- 👤 Signed by the head of department
- 👤 Signed by the dean
- 👤 To be accepted by the student (Vesecký Tomáš)

Student: Vesecký Tomáš

Faculty: 18000 - Faculty of Information Technology

Programme type: B - bachelor

Specialization: BI-S21 - Software Engineering 2021 (in Czech)

Submitting department/institute: 18102 - Department of Software Engineering

Supervisor: Michal Valenta

Supervisor's department: 18102 - Department of Software Engineering

Second supervisor: -

Second supervisor's department: -

Valid to: 28 Feb 2026

External proposer: No

Thesis language: Czech

Thesis name in Czech: Gamifikace výuky finanční gramotnosti

Thesis name in English: Gamification of teaching the basics of financial mathematics

Guideline: Cílem práce je navrhnout a implementovat funkční prototyp aplikace, kterou lze využít při výuce finanční gramotnosti na základních a středních školách. Výsledkem této práce bude plně funkční prototyp herního serveru a jednoduchý klient, přičemž bude pamatováno na jejich rozlišitelnost v budoucnu. Postupujte v těchto krocích: 1. Popište mechaniky hry - budoucí aplikace - na základě již navržené beta verze. 2. Proveďte rešerš existujících nebo podobných řešení. 3. Proveďte návrh nového řešení na základě předchozích dvou bodů. 4. Diskutujte a zvolte vhodnou softwarovou architekturu a vývojové prostředí. 5. Implementujte funkční prototyp backend (herního serveru). 6. Implementujte jednoduchou verzi klienta a administrátorského prostředí. 7. Implementaci vhodným způsobem otestujte a zdokumentujte.
